

SHOE SIZE CHART

All Myos4Golf shoes are manufactured following the European size chart. To find out your shoe size, follow the instructions below to measure your foot, and then use the charts below to find the appropriate size conversions:

Materials required:

- Paper
- Pencil
- Ruler

Instructions:

1. Place a piece of paper bigger than your foot flat on the ground and against the wall.
2. Put your socks on and step on the paper with your heel against the wall.
3. Lean on your feet and make a mark behind your heel and another in front of your longest toe. If one of your feet is larger than the other, use the longer foot to measure your size.
4. Use the ruler to measure the distance between the two lines in inches or centimeters.
